

# ✓ Copilot Adoption Program

# Turn Microsoft 365 Copilot into an everyday working habit.

Help employees adopt Microsoft 365 Copilot through guided learning, AI Fellows, practical exercises and real workplace simulations.

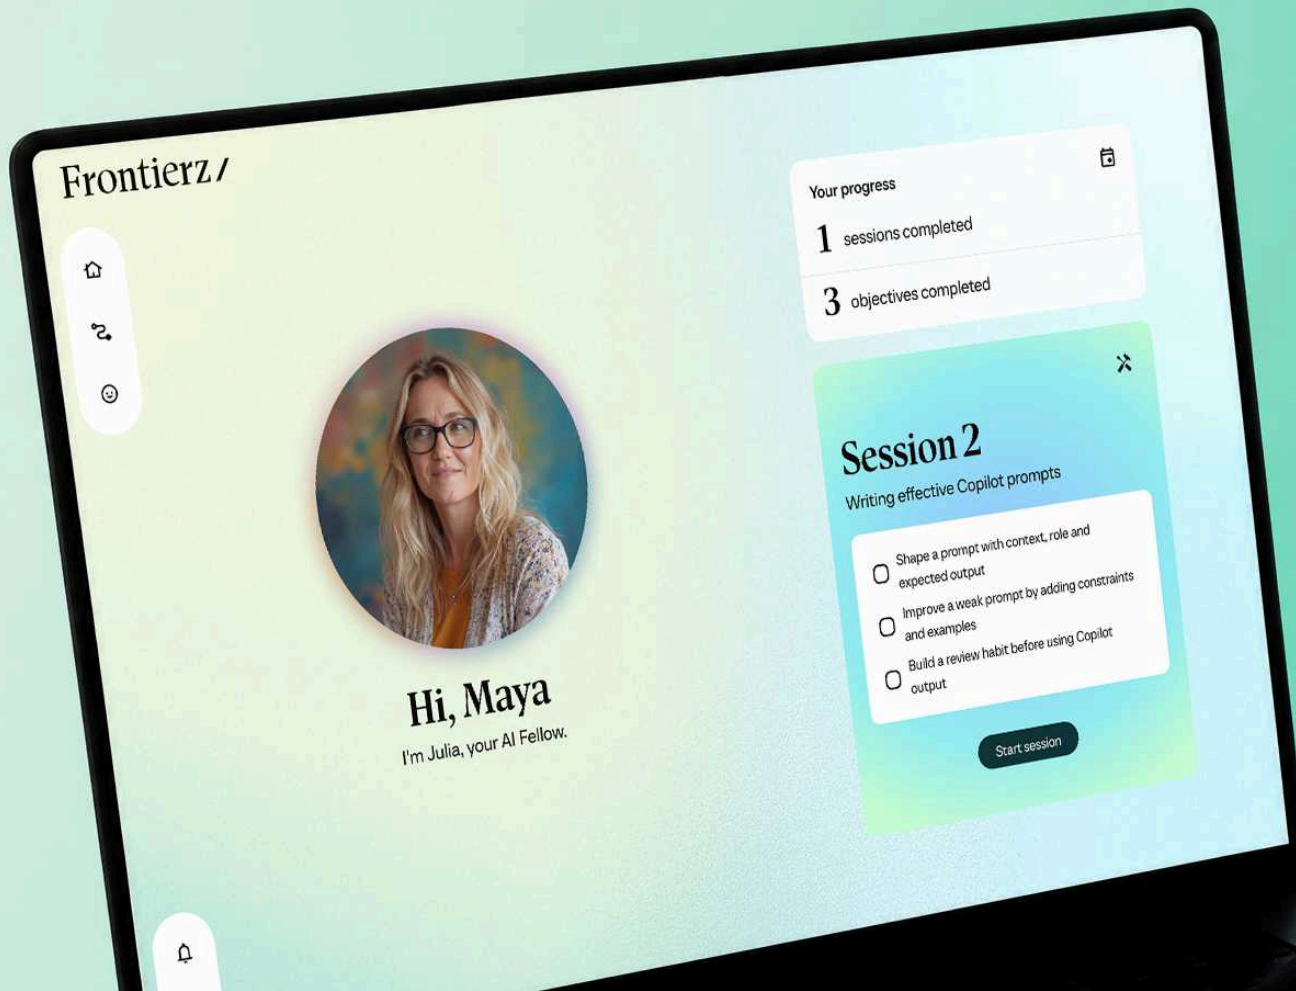

# Who it is for

Organizations that have deployed, or plan to deploy, Microsoft 365 Copilot.

Designed for HR, L&D, IT, Digital Transformation and business teams responsible for effective Copilot adoption.

# / Customer need addressed

Buying Copilot licenses does not automatically create adoption. Employees often need help knowing when to use Copilot, how to ask better questions, how to validate outputs and how to apply AI to real business work.

An AI Fellow for every employee to deliver personalized training

# What the offer includes

## Component

## Description

---

Complete Learning Path

A structured adoption journey focused on practical use cases, safe usage and role-relevant habits.

---

AI Fellow support

Employees can ask questions, get explanations and practice using Copilot in specific work situations.

---

Live insights & actionable data

Admins have full visibility into the adoption rates and AI use cases being created in the organization.

# / Expected Outcomes

Higher Copilot adoption across employees and teams

More confident and responsible daily AI usage

Better understanding of role-specific Copilot opportunities

Less uncertainty in prompting, verification, and limitations

Measurable progress in AI adoption
